

CompTIA Cloud+ Intermediate

Course Overview

This course will teach students about virtualization in the Cloud, resource allocation, and optimization.

Chapter 01 - Virtualization in the Cloud

1h 43m

Topic A: Virtualization Overview - Part 1
Virtualization Overview - Part 2
Virtualization Overview - Part 3
Topic B: Understanding Hypervisors - Part 1
Understanding Hypervisors - Part 2
Understanding Hypervisors - Part 3
Topic C: Configuring Virtualization Hosts - Part 1
Configuring Virtualization Hosts - Part 2
Configuring Virtualization Hosts - Part 3
Topic D: Creating and Configuring Virtual Machines - Part 1
Creating and Configuring Virtual Machines - Part 2
Creating and Configuring Virtual Machines - Part 3
Topic E: Using Virtualization in the Cloud - Part 1
Using Virtualization in the Cloud - Part 2
Using Virtualization in the Cloud - Part 3
Topic F: Migrating Virtual Resources - Part 1
Migrating Virtual Resources - Part 2
Migrating Virtual Resources - Part 3

Chapter 02 - Resource Allocation

1h 2m

Topic A: Monitoring Resources - Part 1
Monitoring Resources - Part 2
Monitoring Resources - Part 3
Topic B: Remote Access Administration - Part 1
Remote Access Administration - Part 2
Remote Access Administration - Part 3
Topic C: Examining Host Resource Allocation - Part 1
Examining Host Resource Allocation - Part 2
Examining Host Resource Allocation - Part 3
Topic D: Examining Virtual Machine Resource Allocation - Part 1
Examining Virtual Machine Resource Allocation - Part 2
Examining Virtual Machine Resource Allocation - Part 3

Chapter 03 - Optimization

59m

Topic A: Optimizing Performance - Part 1
Optimizing Performance - Part 2
Optimizing Performance - Part 3
Topic B: Policies and Procedures - Part 1

Policies and Procedures - Part 2
Policies and Procedures - Part 3
Topic C: Best Practices - Part 1
Best Practices - Part 2
Best Practices - Part 3

Total Duration: 3h 44m
